Current state

- Trapping Cs single atom
- Cs single atom cooling
- Na MOT
- Looking for trapped single Na atom

Current state

- Trapping Cs single atom
- Cs single atom cooling
- Na MOT
- Looking for trapped single Na atom

Current state

- Trapping Cs single atom
- Cs single atom cooling
- Na MOT
- Looking for trapped single Na atom

Current state

- Trapping Cs single atom
- Cs single atom cooling
- Na MOT
- Looking for trapped single Na atom

Current state

- Trapping Cs single atom
- Cs single atom cooling
- Na MOT
- Looking for trapped single Na atom

Problems

- Sodium laser
- MOT stability

Current state

- Trapping Cs single atom
- Cs single atom cooling
- Na MOT
- Looking for trapped single Na atom

Problems

- Sodium laser
- MOT stability

Current state

- Trapping Cs single atom
- Cs single atom cooling
- Na MOT
- Looking for trapped single Na atom

Problems

- Sodium laser
- MOT stability

Laser system for Sodium

Sodium wavelengths

- D lines $\approx$ 589nm
- D2 line (Cooling, Imaging)
- D1 line (Pumping, Cooling)
- Off resonance (Raman transition)

Laser system for Sodium

Sodium wavelengths

- D lines $\approx$ 589nm
- D2 line (Cooling, Imaging)
- D1 line (Pumping, Cooling)
- Off resonance (Raman transition)

Laser system for Sodium

Sodium wavelengths

- D lines $\approx$ 589nm
- D2 line (Cooling, Imaging)
- D1 line (Pumping, Cooling)
- Off resonance (Raman transition)

Laser system for Sodium

Sodium wavelengths

- D lines $\approx$ 589nm
- D2 line (Cooling, Imaging)
- D1 line (Pumping, Cooling)
- Off resonance (Raman transition)

Laser system for Sodium

Sodium wavelengths

- D lines $\approx$ 589nm
- D2 line (Cooling, Imaging)
- D1 line (Pumping, Cooling)
- Off resonance (Raman transition)

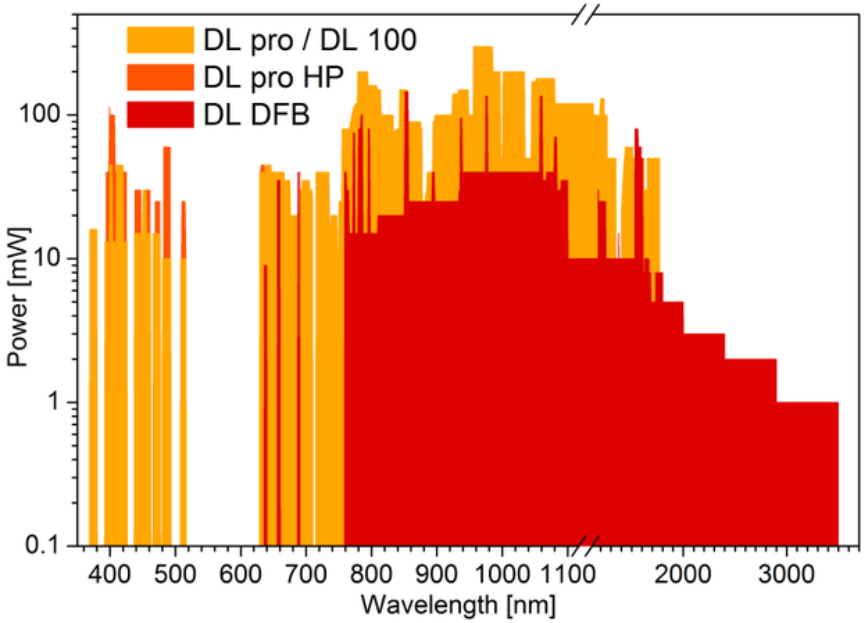
Using diode laser

- Diode laser spectrum
- Power requirement for frequency doubling
- Diode laser from Innolume / TimeBase
- Waveguide doubler

Laser system for Sodium

Sodium wavelengths

- D lines $\approx$ 589nm
- D2 line (Cooling, Imaging)
- D1 line (Pumping, Cooling)
- Off resonance (Raman transition)



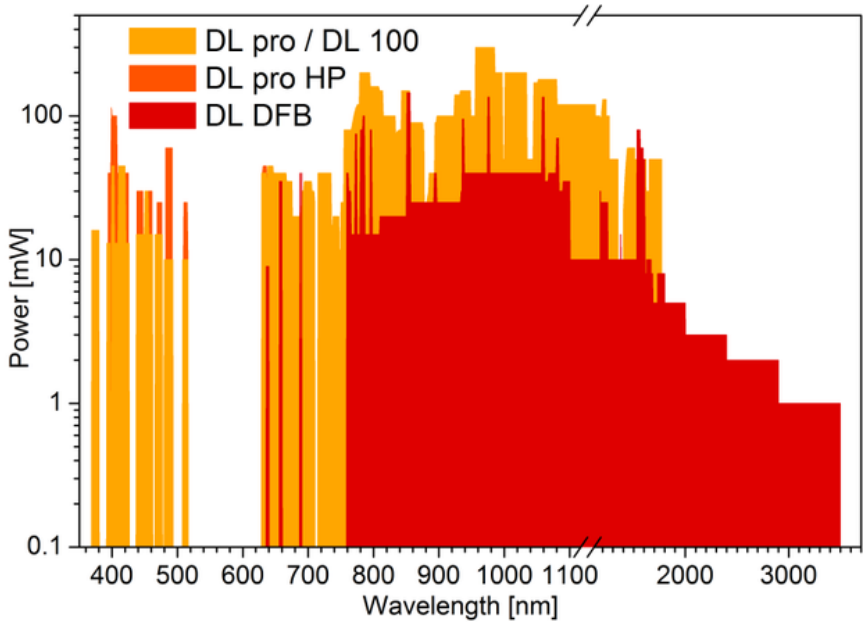
Using diode laser

- Diode laser spectrum
- Power requirement for frequency doubling
- Diode laser from Innolume / TimeBase
- Waveguide doubler

Laser system for Sodium

Sodium wavelengths

- D lines $\approx$ 589nm
- D2 line (Cooling, Imaging)
- D1 line (Pumping, Cooling)
- Off resonance (Raman transition)



Using doubled diode laser

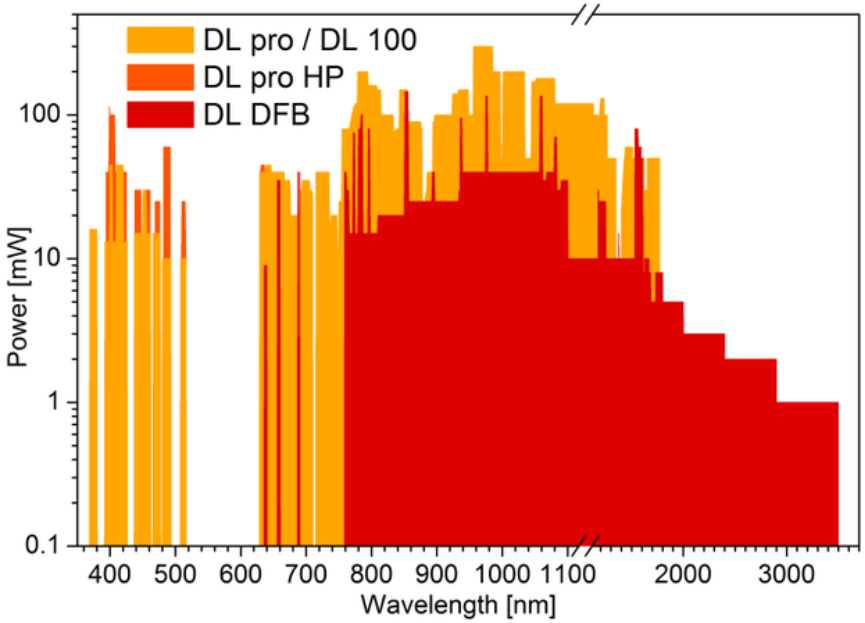
$589 \times 2 = 1178$**nm**

- Diode laser spectrum
- Power requirement for frequency doubling
- Diode laser from Innolume / TimeBase
- Waveguide doubler

Laser system for Sodium

Sodium wavelengths

- D lines $\approx$ 589nm
- D2 line (Cooling, Imaging)
- D1 line (Pumping, Cooling)
- Off resonance (Raman transition)



Using doubled diode laser

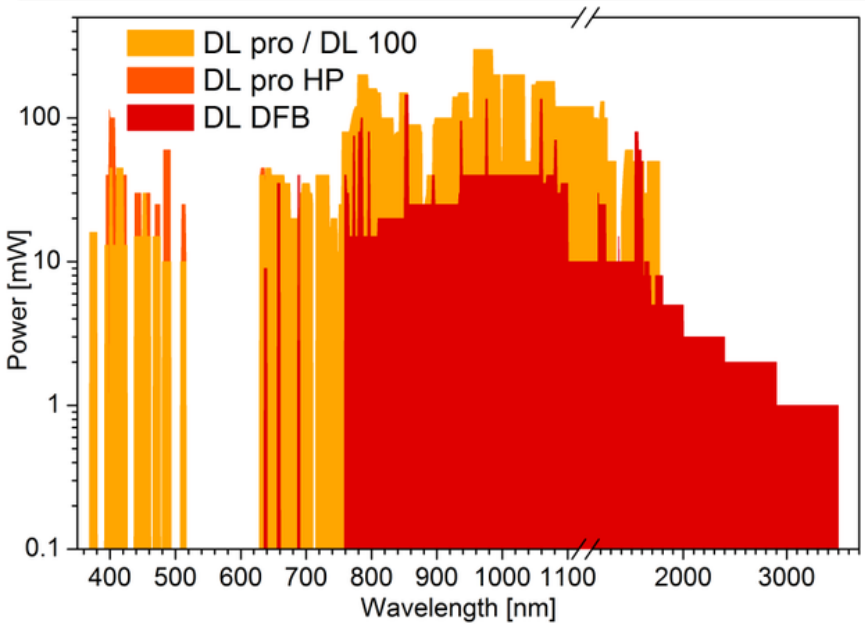
$589 \times 2 = 1178$**nm**

- Diode laser spectrum
- Power requirement for frequency doubling
- Diode laser from Innolume / TimeBase
- Waveguide doubler

Laser system for Sodium

Sodium wavelengths

- D lines $\approx$ 589nm
- D2 line (Cooling, Imaging)
- D1 line (Pumping, Cooling)
- Off resonance (Raman transition)



Using doubled diode laser

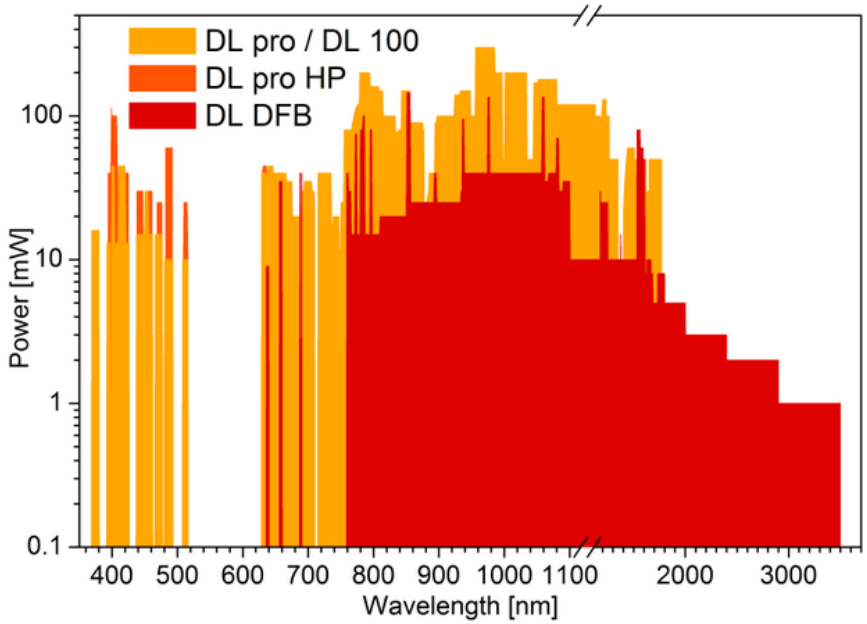
$589 \times 2 = 1178$**nm**

- Diode laser spectrum
- Power requirement for frequency doubling
- Diode laser from Innolume / TimeBase
- Waveguide doubler

Laser system for Sodium

Sodium wavelengths

- D lines $\approx$ 589nm
- D2 line (Cooling, Imaging)
- D1 line (Pumping, Cooling)
- Off resonance (Raman transition)



Using doubled diode laser

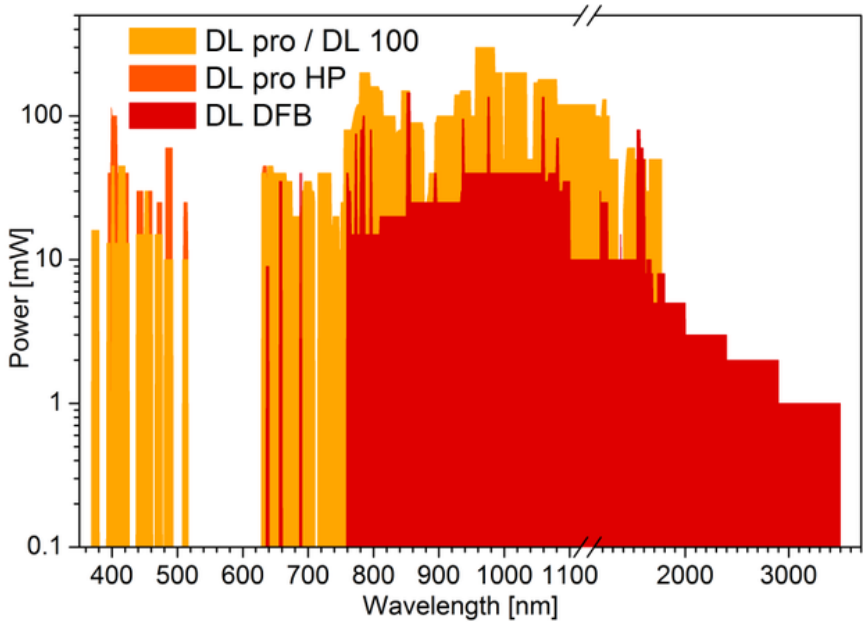
$589 \times 2 = 1178$**nm**

- Diode laser spectrum
- Power requirement for frequency doubling
- Diode laser from Innolume / TimeBase
  Tunable from …nm to …nm
- Waveguide doubler

Laser system for Sodium

Sodium wavelengths

- D lines $\approx$ 589nm
- D2 line (Cooling, Imaging)
- D1 line (Pumping, Cooling)
- Off resonance (Raman transition)



Using doubled diode laser

$589 \times 2 = 1178$**nm**

- Diode laser spectrum
- Power requirement for frequency doubling
- Diode laser from Innolume / TimeBase
  Tunable from …nm to …nm
- Waveguide doubler

Laser system for Sodium

Sodium wavelengths

$589 \times 2 = 1178$**nm**

- Diode laser spectrum
- Power requirement for frequency doubling
- Diode laser from Innolume / TimeBase
  Tunable from …nm to …nm
- Waveguide doubler

MOT stability

- Interference and stability issue with a small MOT
- Modulating the MOT beams

MOT stability

- Interference and stability issue with a small MOT
- Modulating the MOT beams
